Prayerful greetings to you from Fiji! Mother Nanise is already discharged from the hospital and currently with the Josephite Sisters at Bondi, (NSW, Australia).

She is improving a lot. The foot is still not 100% but with the splint on she is able to get around. She looks healthy, is talking, eating and exercising well.

Her last treatment which is radioactive iodine is scheduled for the 25th of May but this will depend on her. Hopefully, after that she would be able to return to Fiji when she is ready. One of our junior professed sister is taking care of her at the convent.

Thank you for all the prayers of the many people who are praying for her. We appreciate very much your great help and support.
